BOAT SPECIFICATIONS Eelex 8000

Eelex 8000

Our flagship model is an 8 meter, high-performance center-console boat with an award winning Scandinavian design that naturally blends in with nature.

Every part of the Eelex 8000 is engineered from the ground up to take maximum advantage of the powerful all-electric drivetrain and other on-board cloud-connected systems.

Its integrated aluminum rails offer different interior modules, such as a sofa and table, that can be converted into a sunbed.

The Eelex 8000 is built for high performance with a 170 kW motor and a 126 kWh battery capacity that ranges up to 100 nautical miles at lower speeds.

Smart boating

 X SHORE

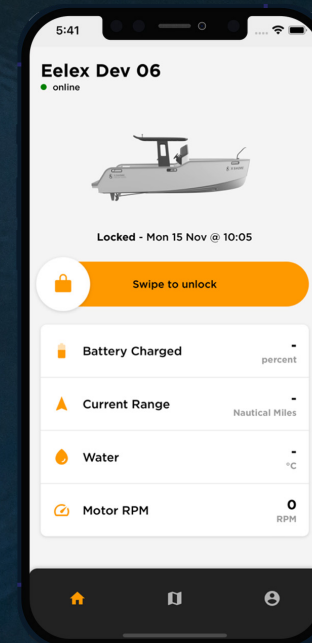

Infotainment system

From the helm the driver and passengers can manage the X Shore infotainment system, including sound and lighting, energy and route planning, weather and notifications center. Everything is managed from a large touchscreen with software designed by X Shore.

Watch

Our Garmin Captains watch functions as a remote key and contains a man overboard feature for additional safety. When 10 meters away from the vehicle or underwater, the Elex 8000 automatically stops.

ENTERTAINMENT

Music streaming in premium sound speakers.

Charge all your devices with USB-C and USB-A in the center console.

APP

Much of the technology is connected to and handled by the X Shore app which also functions as a remote key. See the status of your boat at all times.

Ease of use

Always-on location, error and performance tracking. Always visible range & battery-level indication.

Low-power wireless network for safety and security features.

Remote maintenance, customization and software updates. Onboard systems will protect batteries and motor from reaching any critical levels.
